2024-2025 APGO ACADEMIC SCHOLARS AND LEADERS PROGRAM
ASSOCIATION OF PROFESSORS OF GYNECOLOGY AND OBSTETRICS
Educational Application Project Abstract Guidelines

Due Dates:

7/25/2024	Draft #1 EAP Abstract
11/6/2024	Draft #2 EAP Abstract
12/5/2024	Draft #3 EAP Abstract
12/21/2024	Final EAP Abstract

The *Abstract* word limit is 250 **not including** title, authors, affiliations, local mentor, APGO advisor and key words.

All Abstracts should begin with the following:
Title:
Authors: to determine eligibility for authorship use the criteria recommended by the International Committee of Medical Journal Editors (http://www.icmje.org)
Affiliations:
Local Mentor:
APGO Advisor:
Key Words: 3-5 key words or phrases

Evidence-Based Education Project:

Problem: Briefly state the practical learning or performance gap addressed by the intervention.

Intervention: Briefly describe the intervention, specifying how it addresses the practical problem.

Context: Briefly summarize the context in which the intervention was implemented.

Outcome/Lessons Learned: Briefly describe what happened to the educational process and outcomes when the intervention was implemented.

Research Project:

Objective: Main question, objective or hypothesis. Single phrase, e.g., "To estimate" or "To evaluate . . ."

Methods: Study design, participants, independent variable (intervention, predictor, exposure) and outcome measures, statistical analysis and, in the case of a negative study, statistical power.

Results: Measurements expressed in absolute numbers and percentages, and when appropriate indicate relative risks or odds ratios with confidence intervals and levels of significance. Do not include tables or figures.

Conclusion: Directly supported by the data, along with implications.

Literature Review Abstract:

Objective: State the purpose of the review.

Data Sources: Sources searched including dates, terms and constraints.

Methods of Study Selection: Number of studies reviewed and selection criteria.

Tabulation, Integration and Results: Guidelines for extracting data and methods of correlating (if applicable), and results of review.

Conclusion: Primary conclusions and their applications.
